SUMMARY

Ruby on Rails Backend Engineer with 4.5+ years of experience building and scaling SaaS products from the ground up. At Corelto, I independently designed and developed a multi-module Real Estate CRM used to automate critical business operations including lead management, booking workflows, inventory management, broker settlements, invoicing, and financial reconciliation. Experienced in architecting scalable backend systems, REST APIs, background job processing, database optimization, and delivering end-to-end product features from requirements gathering to production deployment.

EXPERIENCE

Software Developer

Corelto Next Gen Pvt. Ltd

08/2024 Ahmedabad

A company focused on developing innovative software solutions

- Develop and maintain Real Estate CRM solutions covering pre-sales and post-sales workflows
- Built Broker Settlement Tool to manage broker commissions, billing, and reconciliations
- Implement dynamic UI interactions using Stimulus, improving responsiveness
- Developed automated reconciliation scripts and reporting modules using Ruby on Rails to eliminate manual financial tracking.
- Collaborate with stakeholders to deliver CRM modules aligned with business workflows
